BRIAN BIER
FULL STACK DEVELOPER

Projects

IMDB Clown

IMDB clone is a fully functional application completed in 3 days. It was a replica of the original IMDB. The web application was built using Ruby on Rails, Bootstrap, Jquery, OmniAuth Facebook authentication and the Open source movie database API.

ICYMI(In Case You Missed It)

An IOS app, that shows the users searchable list businesses
they pass throughout the day in
order to help them find places they may have missed. The application was a final project built in 6 days and it was built with Ruby on Rails as a backend API, the Google Places API and React Native for the mobile app .

StackOverflow Clown

Stack Overflow clone was created in order to show our skills in building complex databases using a polymorphic assocation. The application was built using Sinatra for the backend as well as the Jquery Library and the Bootstrap framework for the front end.
